

DENE B

Precision Live Center

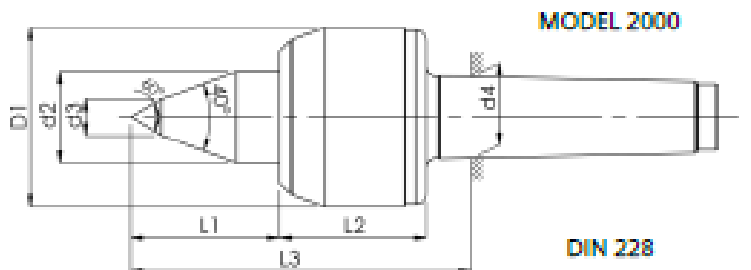

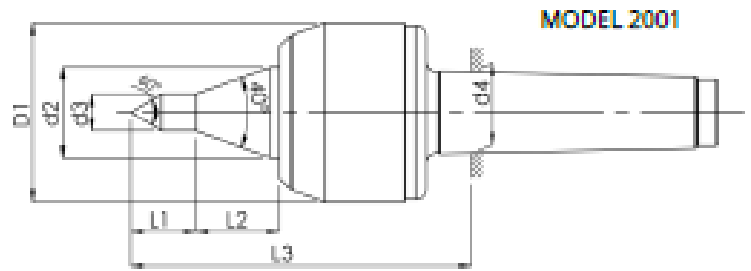

FEATURES

- *C series Live center is designed for use in CNC lathes. Due to the different sizes of live Center, it is suitable for turning various workpieces..
- The center of the live center is hardened and precisely ground. Live center have 0.005 backlash.
- The lively center end is designed to be long.it deal at the axial and radial loads evenly throughout the tailstock body. Extends bearing and live center life.
- Thanks to the lubrication cover on the back of the rotating tailstock, the tailstock can maintain its precision for many years.
- The body of the live center and the center are made of wear-resistant heat treatment steel and hardened.
- Thanks to the triple designed bearing system, it provides a rigid and cleaner turning surface.
- Thanks to its precision and quality bearings, it is resistant to axial and radial loads as well as high speeds.
- The bearings are protected against liquid and environmental contamination by means of a seal mounted on the front cover of the rotating tailstock.
